

Facundo Radicich

AI & Data Automation | Python · SQL · LLMs · ERP Integrations · Analytics

Buenos Aires, Argentina (open to remote) · facundoradicich@gmail.com · linkedin.com/in/facundoradicich-8b1931130 · Portfolio: facundoradicich.github.io/portfolio

SUMMARY

Founder who led a company's sales and marketing teams and turned its operations data-driven: first with a CRM, then an ERP, and in 2026 with Python integrations, an LLM-powered order app, analytics and production planning in daily use. Quantitative background in advanced mathematics and statistics (Actuarial Science coursework) and Data Science training, including machine learning. I start from the business problem, lead people through the change, and ship tools that stay in production. Looking for full-time roles in applied AI, automation or data.

EXPERIENCE

OH My Chalk! - Founder & CEO · Data & Automation Lead

Feb 2017 - Present · Buenos Aires

Paint brand with 130+ SKUs and B2B distribution in 18 provinces. Operations are now delegated; since 2026 my focus is the company's data and automation systems.

LEADERSHIP AND COMMERCIAL MANAGEMENT

- Led the sales team, the network of independent sales brokers and the marketing team (up to 10 people).
- Set up and ran Pipedrive CRM (2018-2024) to track customers and deals; analyzed 2,500+ deals and found that strategic accounts brought 20% of revenue with 6% of the team's effort, and proposed a contact cadence per account tier.
- Led the 2024 migration to Odoo ERP to run sales, customer management, accounting and production in one system.

DATA, AI AND AUTOMATION

- **LLM order intake app:** FastAPI + Supabase (PostgreSQL) on Render. Reads handwritten order photos with the Claude API (vision), parses Excel/PDF orders, and tracks invoices, payments and 7% commissions for 10 brokers, with auth, role-based dashboards and rate limiting.
- **ERP automation:** Python integrations with Odoo (XML-RPC) that create sales orders with customer matching by tax ID, pricelists, discounts and tax rules, plus price-drift alerts. Removed manual order entry.
- **Broker and customer follow-up:** automated weekly account statements with per-customer PDFs for each broker, and repurchase alerts based on each customer's own buying rhythm.
- **Analytics:** live sales dashboard on ERP data (broker, region, product, customer) through +88% half-over-half growth, and a lead-scoring model that ranks 440 dormant accounts.
- **Production planning:** Odoo MRP with 132 bills of materials, a 6-month demand forecast and reorder points; a Python stock-out simulation ranks what to produce first.

PROJECTS (code and demos in the portfolio)

- **Workshop Marketplace:** Next.js 16, TypeScript, Prisma and Postgres app where teachers publish painting workshops, with student accounts and a map of ~550 points of sale that stores validate themselves.
- **Customer churn model:** five classifiers (logistic regression, random forest, gradient boosting, neural network) compared with cross-validation and ROC-AUC, permutation importance and a cost-based decision threshold.
- **Expense tracker:** Streamlit app that extracts and categorizes transactions from credit-card PDF statements of six banks (pdfplumber, pandas, Plotly).

SKILLS

Data & ML: Python (pandas, NumPy, scikit-learn, matplotlib, pdfplumber), SQL, PostgreSQL, statistics, forecasting, classification models, Power BI, Excel

AI & automation: LLM APIs (Anthropic Claude, vision and text), prompt engineering, AI-assisted development, Odoo ERP (Sales, Accounting, Inventory, MRP), Pipedrive, Zapier, Make

Engineering: FastAPI, REST and XML-RPC APIs, Supabase, Next.js, TypeScript, Prisma, Streamlit, Git/GitHub, Render, Vercel

Leadership: team leadership, sales management, change management (CRM to ERP), sales psychology (cognitive biases), cross-functional communication

EDUCATION

Data Science & Analytics - Coderhouse · 2023 - 2024 · Python, statistics, machine learning, Power BI

Actuarial Science (coursework) - Universidad de Buenos Aires · 2017 - 2020 · Advanced mathematics, probability and statistics, financial mathematics

Bachelor's Degree in Business Administration - Universidad de Buenos Aires · 2014 - 2021

Sales and cognitive biases - online course

LANGUAGES

Spanish (native) · English (full professional; Cambridge First Certificate, FCE)
