SUMMARY

I founded OH My Chalk! and ran its growth: I led the sales and marketing teams, moved commercial management first to a CRM and then to an ERP that I implemented myself, and in 2026 built the data and AI systems the company runs on today. Background in advanced mathematics and statistics (Actuarial Science coursework) and training in Data Science and machine learning. I work from the business problem to the tool, and I leave solutions running in production. Looking for a full-time role in applied AI, automation or data.

EXPERIENCE

OH My Chalk! - Founder & CEO · Data & Automation Lead

Feb 2017 - Present · Buenos Aires

Paint brand with 130+ products and B2B distribution in 18 provinces. Operations are now delegated; since 2026 I work on the company's data and automation systems.

LEADERSHIP AND COMMERCIAL MANAGEMENT

- Led the sales team, the network of independent sales brokers and the marketing team (up to 10 people).
- Implemented Pipedrive CRM (2018-2024) to track customers and deals. Analyzed 2,500+ deals and found that strategic accounts brought 20% of revenue with 6% of the sales effort; proposed a contact cadence per account tier based on it.
- Led and implemented the 2024 migration to Odoo ERP to run sales, customers, accounting and production in one system.

DATA, AI AND AUTOMATION

- **LLM order intake app:** built a FastAPI + Supabase (PostgreSQL) app, deployed on Render, that reads photos of handwritten orders with the Claude API (vision) and processes Excel and PDF orders. It manages invoices, payments and commissions for 10 brokers, with authentication, role-based dashboards and rate limiting.
- **ERP automation:** integrated Python with Odoo (XML-RPC) to create sales orders automatically: it matches the customer by tax ID, applies price lists, discounts and taxes, and flags prices that don't match the catalog. Removed manual order entry.
- **Broker and customer follow-up:** automated a weekly email to each broker with their portfolio's account statement and one PDF per customer, plus alerts when a customer falls behind their usual buying rhythm.
- **Analytics:** built a sales dashboard on ERP data (broker, region, product, customer) to track +88% half-over-half growth, and a lead-scoring model to prioritize 440 accounts that never ordered.
- **Production planning:** set up Odoo MRP with 132 bills of materials, a 6-month demand forecast and reorder points, and wrote a Python simulation to decide what to produce first.

PROJECTS (code and demos in the portfolio)

- **Workshop marketplace:** Next.js 16, TypeScript, Prisma and Postgres app where teachers publish painting workshops, with student accounts and a map of ~550 points of sale that stores and validates themselves.
- **Churn model:** compared five classifiers (logistic regression, random forest, gradient boosting, neural network) with cross-validation and ROC-AUC, and set the decision threshold from the business cost.
- **Expense tracker:** Streamlit app that reads credit-card PDF statements from six banks and categorizes every transaction (pdfplumber, pandas, Plotly).

SKILLS

Data & ML: Python (pandas, NumPy, scikit-learn, matplotlib, pdfplumber), SQL, PostgreSQL, statistics, forecasting, classification models, Power BI, Excel

AI & automation: LLM APIs (Anthropic Claude, vision and text), prompt engineering, AI-assisted development, Odoo ERP (Sales, Accounting, Inventory, MRP), Pipedrive, Zapier, Make

Engineering: FastAPI, REST and XML-RPC APIs, Supabase, Next.js, TypeScript, Prisma, Streamlit, Git/GitHub, Render, Vercel

Leadership: team leadership, sales management, change management (CRM to ERP), sales psychology (cognitive biases), cross-functional communication

EDUCATION

Data Science & Analytics - Coderhouse · 2023 - 2024 · Python, statistics, machine learning, Power BI

Actuarial Science (coursework) - Universidad de Buenos Aires · 2017 - 2020 · Advanced mathematics, probability and statistics, financial mathematics

Bachelor's Degree in Business Administration - Universidad de Buenos Aires · 2014 - 2021

Sales and cognitive biases - online course

LANGUAGES

Spanish (native) · English (full professional; Cambridge First Certificate, FCE)
